PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/562,416	Applicant(s) SULLIVAN, PATRICK K.	
	Examiner NAVIN NATNITHITHADHA	Art Unit 3735	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Response to Amendment

1. The status of the claims are as follows:

Claims 1-26 are as originally filed.
2. Applicant filed a Substitute Specification on 23 February 2006. However, this Substitute Specification does not include the changes to the Specification made in Applicant's Preliminary Amendment, filed on 23 December 2005, which contains a reference to the corresponding PCT International application and the prior-filed U.S. Provisional application. Applicant is directed to file a new amendment to the specification to correct this discrepancy.

Drawings

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

4. The disclosure and claims is objected to because of the following informalities:

The Applicant's disclosure and claims uses the word "discretized". However, this word is not defined in any dictionary. Did the Applicant mean to use the word "discrete"? Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claims 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 includes the phrase "related medical conditions". This phrase is indefinite because it is not clear what medical conditions could be considered as "related medical conditions".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by John, U.S. Patent No. 4,974,598 A ("John").

Claims 14-26: John teaches a radiation stress, non-invasive vital sign monitoring device (see Abstract) comprising:

one or more discretized sensor arrays 10 for continuously, in real-time, measuring and collecting discretized acoustic, electromechanical, or other physiological signals, over a range of frequencies, or in a time domain or frequency domain from a patient, who is in contact with the discretized sensor arrays (see col. 6, ll. 10-34);

a surface on the one or more discretized sensor arrays for engaging a patient (see fig. 2);

a transmission system 11 for transmitting data, via wire, fiber optics or wirelessly, collected by the one or more discretized sensor arrays (see fig. 2);

a receiving device 13 for receiving the transmitted data from the one or more discretized sensor arrays (see fig. 2); and

a computing device 14 connected to the receiving device 13 for calculating values of vital signs of the patient, e.g. average, mean, systolic and diastolic arterial blood pressure, hypertension and/or related medical conditions, by: producing time series data from various discretized sensor array signals, calculating energy spectrum from the time series data, and determining variance of each discretized sensor array (see col. 5, l. 45, to col. 7, l. 14).

Claims 1-13: Because the method of claims 1-13 are not distinct from the apparatus of claims 14-26, the method of claims 1-13 are anticipated by John for the same reasons as above for claims 14-26.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NAVIN NATNITHITHADHA whose telephone number is (571)272-4732. The examiner can normally be reached on Monday-Friday, 9:00 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor, II can be reached on (571) 272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
